YAHIA ABDULLAH

Senior Backend Engineer | Software Architect

Cairo, Egypt | +20 115 651 0548 | yahiafcih2014@gmail.com | linkedin.com/in/yahia-abdullah-981b46113

PROFESSIONAL SUMMARY

Senior Backend Engineer and Software Architect with 7+ years of experience building distributed systems for TravelTech, Logistics, and EdTech. Architected a SaaS travel platform processing $3M+ monthly revenue, 5M+ daily searches, and 10K+ monthly bookings with 99.9% uptime. distributed systems, payment integrations, multi-tenant SaaS, and cloud-native deployments on AWS. Experienced technical lead mentoring engineers and driving architecture decisions.

CORE SKILLS

Languages: PHP, Python, Node.js, SQL, Bash

Architecture: Domain-Driven Design, Event-Driven Architecture, Multi-tenant SaaS, REST API Design, Design Patterns (State, Factory, Decorator, Repository, DTO)

Distributed Systems: Saga Pattern, Outbox Pattern, Idempotency, Distributed Transactions, Optimistic/Pessimistic Locking, MVCC

Databases: MySQL (InnoDB, Query Optimization, GTID Replication, Read/Write Splitting), PostgreSQL, MongoDB

Caching & Search: Redis, Meilisearch

Cloud & DevOps: AWS (EC2, ECR), Docker, Docker Swarm, Nginx, Supervisor, PM2, Bitbucket Pipelines, Cloudflare

Payment Integrations: Stripe, Checkout.com, Tabby (BNPL), Tamara, Fawaterak, Geidea, Network Genius, Payfort, Paymob, MyFatoorah, Tap, Apple Pay — cards, digital wallets, and BNPL in multi-currency, revenue-critical flows

Travel & Shipping APIs: GDS (Amadeus, Sabre, Travelport), carriers (DHL, Aramex, Mylerz, J&T, Boosta)

Version Control: Git, Bitbucket

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Architect — Tripklik

August 2022 – Present | Cairo, Egypt

Core architect and backend engineer of a white-label SaaS travel platform generating $3M+ monthly revenue for client agencies and powering multiple B2B and B2C travel operations.

- Engineered search infrastructure handling 5M+ daily searches across multiple GDS and travel providers (Amadeus, Sabre, Travelport).
- Optimized the booking pipeline processing 10K+ monthly bookings with 99.9% uptime; reduced API response times by 40% through query optimization, strategic indexing, and Redis caching.
- Eliminated booking race conditions and overselling by applying pessimistic row-level locking and inventory reservation flows on MySQL/InnoDB.
- Migrated production workloads to Docker Swarm on AWS EC2, enabling zero-downtime rolling deployments with ECR-based image pipelines and Cloudflare-fronted services.
- Implemented MySQL GTID-based replication with Laravel read/write splitting to scale read-heavy search and reporting workloads.
- Designed a State Machine engine for order lifecycle management with channel-aware event dispatching (B2B, B2C, Corporate).
- Built a Factory-pattern product handler system supporting flights, hotels, transfers, and packages behind a unified booking flow.
- Architected a multi-currency pricing engine with configurable markup rules, percentage/fixed pricing models, and real-time currency conversion.
- Integrated 6+ payment gateways — Stripe, Checkout.com, Tabby (BNPL), MyFatoorah, Tap, and Apple Pay — covering card payments, digital wallets, and buy-now-pay-later, with gateway callback/webhook handling in revenue-critical, multi-currency booking flows.
- Built a unified GDS abstraction layer for flights, hotels, and ancillary services (baggage, seats, insurance) with real-time pricing synchronization.

Tech: Laravel (PHP), FastAPI (Python), MySQL, MongoDB, Redis, Meilisearch, Docker Swarm, AWS EC2/ECR, Nginx, Supervisor, PM2, React

Technical Lead — Eyedel (Tripklik shipping platform)

August 2022 – Present | Cairo, Egypt (concurrent role within Tripklik)

Led development of a shipping aggregation platform connecting e-commerce merchants with multiple carriers.

- Designed a provider-agnostic integration layer for DHL, Aramex, Mylerz, J&T, and Boosta.
- Built a flexible rate sheet system supporting global and merchant-specific pricing rules.
- Implemented a webhook processing pipeline for reliable, real-time shipment tracking updates.
- Led a team of 3 backend developers: code reviews, mentoring, and architectural decisions.

Tech: Laravel, FastAPI, MySQL, Redis, Nginx

Senior Software Engineer — Our Education for Investment

August 2021 – August 2022 | Cairo, Egypt | ouredu.net

Backend engineer for a large-scale K-12 educational platform serving 25,000+ students, 50,000+ parents, and 3,000+ teachers across multiple schools.

- Developed an exam management system and educational tools handling 6,250+ daily active usage hours.
- Optimized database queries, reducing page load times by 35%.
- Implemented role-based access control for a multi-school, multi-tenant architecture.

Tech: Laravel (PHP), Python, MySQL, Redis, Nginx

Squad Lead — TopQdrat Platform

topqdrat.com

Led a development team building an online exam preparation platform for Qudrat and Tahsili exams.

- Architected course management, mock exam systems, and student progress tracking on a scalable database schema.
- Coordinated product, design, and operations teams for release planning and stable deliveries.

Early Career

- Backend Developer, Kite Agency (2020 – 2021); PHP Developer, DevoJet (2019 – 2020); PHP Developer, Lodex-Solutions (2018 – 2019); Backend Developer, Codex (2017).
- Built RESTful APIs for web and mobile applications, managed server deployments (Nginx, Supervisor, Vagrant), and focused on database design and performance optimization.

EDUCATION

Bachelor of Computer and Information Sciences — Helwan University, Cairo

Graduated: 2021

LANGUAGES

Arabic (Native) | English (Intermediate)
